

Student Teacher Portal - API Documentation

This document contains the API documentation for the Student Teacher Portal project developed using Angular 19, Laravel 12, MySQL, and JWT Authentication.

Base API URL

http://127.0.0.1:8000/api

Tech Stack

Technology	Version
Angular	19
Laravel	12
MySQL	8+
PHP	8.2.12
JWT Authentication	Enabled

Role Mapping

Role	Value
Teacher	1
Student	2

Register API

Method	POST
Endpoint	/register

Request Example

```
{
  "vch_name": "Rahul",
  "vch_email": "teacher@gmail.com",
  "vch_password": "123456",
  "int_role": 1
}
```

Response Example

```
{
  "status": true,
  "message": "Registration Successful"
}
```

Login API

Method	POST
Endpoint	/login

Request Example

```
{
  "vch_email": "teacher@gmail.com",
  "vch_password": "123456"
}
```

Response Example

```
{
  "status": true,
  "message": "Login Successful",
  "jwt_token": "TOKEN",
  "user": {
    "intId": 1,
    "vch_name": "Rahul",
    "int_role": 1
  }
}
```

Logout API

Method	POST
Endpoint	/logout

Request Example

Authorization Header:
Bearer YOUR_JWT_TOKEN

Response Example

```
{
  "status": true,
  "message": "Logout Successful"
}
```

Profile API

Method	GET
Endpoint	/profile

Request Example

Authorization Header:
Bearer YOUR_JWT_TOKEN

Response Example

```
{
  "status": true,
  "user": {
    "intId": 1,
    "vch_name": "Rahul"
  }
}
```

```
}  
}
```

JWT Authorization

All protected APIs require JWT Token in the Authorization header.

Example:

Authorization: Bearer YOUR_JWT_TOKEN
